

VARIANZA PLATFORMS

- **OSS Essentials**
 - **OSS Merchandise**
 - The organization will hold a merchandise sale featuring statistics-related items such as ID laces, shirts, tote bags, stickers, and other educational materials. This activity aims to raise additional funds to support the organization's programs, projects, and activities (PPAs). It will also promote interest in statistics while providing members with useful and creatively designed merchandise.
- **OSSHub**
 - **OSS Digital Hub**
 - The organization will create an online website that will serve as a digital hub for Statistics students. This digital hub will showcase achievements, research, activities, and a collection of other projects done by Statistics students. This project aims to provide Statistics students with an easily navigable website when they need to search for archived academic works, announcements, and learning materials.
- **OSSDevelop**
 - **Local Statistics Competitions**
 - The organization will organize healthy and competitive academic events for Statistics students. This project aims to test and develop students' skills in Mathematics, Statistics, and Coding. It will promote interest in honing academic skills and expertise in the selected fields
 - **Research Congress**
 - The organization will organize a Research Congress to showcase research papers created by Statistics students. This project aims to present these academic works to the public while also archiving them as references for future academic papers. It will promote a culture of research, knowledge sharing, and academic excellence among Statistics students.
- **OSSCore**
 - **Coding and Statistics Seminars**
 - The organization will host informative seminars involving skills and topics that are relevant to the current state of Statistics. This project aims to provide Statistics students with familiarity with statistical tools, coding languages, and current trends in the field of Statistics.
 - **Statistics Check-In**
 - The organization will host interviews during relevant academic events and activities. Interviews with professionals will be done

to share their experiences and expertise, while interviews with students will be done for casual check-ins.

- **Statistics Peer Tutoring**
 - The organization will create a collection of personally created and faculty-approved learning materials for key fundamental concepts related to the Statistics curriculum. This project aims to assist struggling learners in their studies.
- **OSSConnect**
 - **Calculator Rentals**
 - The organization will organize calculator rentals to provide a reliable source of calculators for Statistics students. The calculators will be sourced from donations from Statistics alumni and readily available resources.
 - **Research Statistics Services**
 - The organization will establish contact with Statistics alumni for research statistics services. This project aims to provide students with a reliable directory of available statisticians who can assist with the statistical aspects of their academic papers.
- **OSSFeed**
 - **Improved Online Engagement**
 - The organization will create an active and informative online space for Statistics students by utilizing the Organization of Statistics Students social media accounts. This project aims to periodically showcase Statistics-related concepts and interactive games for the online audience.
 - **Voice for Student Affairs**
 - The organization will consistently conduct student sensing forms to collect recommendations, concerns, and feedback from Statistics students. These forms will be conducted after each event held by the Organization of Statistics Students. The organization will periodically address common concerns, frequently asked questions, and collected feedback.
